

RED LINE Wheeled Extinguisher Models 150-D, 350-D

Features

- Listed by Underwriters Laboratories (UL), Underwriters Laboratories of Canada (ULC).
- Factory Mutual (FM) and United States Coast Guard (USCG) approved.
- Three ANSUL® dry chemical suppressing agents available: PLUS-FIFTY C, FORAY or Purple-K.
- No pressure regulator required, reducing maintenance costs and producing smooth agent flow.
- Easy pressurization by turning the nitrogen cylinder hand valve.
- Simple operation provided by discharge nozzle with two-position ball valve.
- Aluminum nozzle barrel provides a solid, round agent stream.
- Indicator fill cap pops up red stem when unit is pressurized.
- Options: long range nozzle, quick-opening nitrogen cylinder valve, wide wheels, rubber coated tire, low temperature ULC models, and 100 ft (30 m) hose on most models.
- Six-year limited warranty.

Application

RED LINE Wheeled Fire Extinguishers are manufactured to provide protection for hazardous areas where the potential exists for large fires. They can be strategically located to provide maximum protection for a wide variety of hazards, while taking up a minimum of space, and requiring only one trained person for operation.

These extinguishers are available with three types of ANSUL dry chemical suppressing agents giving them the versatility to protect many types of fire hazards.

The wheeled extinguisher is completely self-contained. An attached nitrogen cylinder is the only pressure source required to completely expel the fire suppressing agent. The pressure remaining in the tank after operation is sufficient for cleaning dry chemical from the discharge hose.

Some typical applications include paint spray booths, dip and quench tanks, offshore platforms, loading racks, fuel storage areas, airports, and heavy manufacturing operations.

Description

Agent Tank – The extinguisher tank is manufactured of welded steel construction with two elliptical dished heads and welded circumferential seams. The tank is designed and constructed for a working pressure of 250 psi (17.2 bar). The top of the tank is fitted with a 4 in. (102 mm) ID fill opening. The tank head has a brass bodied safety relief with bursting disc which will vent at approximately 425 psi (29.3 bar).

RED LINE CR-RT-I-K-350-D

006447

Nitrogen Cylinder and Valve – The nitrogen cylinder is mounted in a vertical position and permits easy access. Volumes are 23 ft³ (0.65 m³) for the 150-D and 55 ft³ (1.55 m³) for the 350-D. Both sizes are Medical “E” nitrogen cylinders.

Each cylinder is equipped with a conventional hand wheel nitrogen cylinder valve and visual pressure gauge. A quick-opening valve is available as an option. Both valves are UL/ULC listed.

Hoses, Valves and Nozzles – The extinguisher is equipped with cadmium-plated brass couplings. The nitrogen hose assembly is 3/8 in. (10 mm) ID with zinc-plated brass couplings.

The nozzle consists of a two-position ball valve and barrel. The nozzle barrel is a converging-diverging aluminum type. The nozzle ball valve assembly is chrome-plated brass.

Nameplates – The nameplate is glare-resistant etched aluminum, and contains hazard identification plus operating and maintenance instructions.

Description (Continued)

Finish – In addition to the standard surface preparation procedures, the steel parts are primed using a corrosion resistant epoxy primer. The top coat is a polyester epoxy paint applied as a liquid and oven or air cured. The dry film is continuous and a minimum thickness of 5-7 mils. The fill cap and nozzle body are black anodized for added corrosion resistance.

Temperature – Standard models are listed and approved for operation in environments with temperatures between –40 °F to 120 °F (–40 °C to 48.8 °C).

Low Temperature – LT models –65 °F to 120 °F (–54 °C to 48.8 °C).
